

Mastering the evolution of texture creation...  
**We'll make your product**

**from the crowd!**

***STAND OUT***

**TEXTURE**

**Mold-Tech<sup>®</sup>**  
Standex ENGRAVING GROUP

**More than ever, it is design that determines the market success of products. The attractiveness of the outer form, the quality look of the surface and the pleasantness of the feel are decisive in winning the favor of the customer. Mold-Tech is the world leader in the development and implementation of creative textures that can give your product the edge to stand out from the crowd.**

### **What appearance will look best on your product?**

- **Natural or Exotic**
- **Organic**
- **Matte finishes / stipples**
- **Technical**
- **Multi-Gloss patterns**
- **Fusions**
- **Graphics**
- **leather grains / hides**
- **woodgrains, slates, cobblestone**
- **gloss management / consistency**
- **geometric and linens**
- **mixed reflective and low-gloss aspects**
- **layered texture effects creating new looks**
- **images or logos incorporated into a pattern**

### **What features do you want from your texture?**

- **Gloss control**
- **Style decoration / simulate a finish**
- **Brand identification (with specific texture or logo textures)**
- **Tactile interface**
- **Sink / knit line cover-up**
- **Harmony of assembled parts**

### **Research & Design Studio**

**Mold-Tech operates the most comprehensive Texture Design Studio in the world. With over 25 artisans, development technicians, and engineers dedicated to advancing the process and artistry of the mold decorating process, your options are constantly expanding. Each plant has its own in-house graphics department available to assist your project with art related development.**

### **The Technology Advantage**

**Mold-Tech has invested continual resources in advanced texturing technologies that have produced dramatic and exciting results – a direct benefit to you. Render-Tech Seamless Texturing gives the ability to render a digital image with texture and manipulate the texture to fit complex contours – even geometric textures – seamlessly. We can then digitally transfer the texture patterns directly onto the production molds via exclusive Mold-Tech Digital Transfer Technology (D.T.T.).**

**We can now do what was never before imagined – this new technology makes your ideas come to life!**

**Solutions to specific questions are as close a phone call or email – please contact us.**

**For technical information on texturing, please refer to our  
Texture Technical Data Sheet.**
